SUBJECT INDEX

Acousto-Optics—Fundamentals and Wideband Applications, Guided-Wave, 132
Advances in Heterojunction Lasers for Fiber Optics Applications, 123
Applications of Guided Wave Optics, 107

Bell Laboratories, Integrated Optics Research at, 111
Bidirectional Coupler for Full Duplex Transmission on a Single Optical Fiber, 63
Bistable Optical Devices for Integrated Optics and Fiber Optics Applications, 174
Blood Vessels, Laser Photocoagulation of, 34

Cable TV Trunking Applications, Fiber-Optic Digital Video Systems for Commercial, 53
Canada, Optical Fiber Communications in, 43
Channel Transmission on a Single Optical Fiber, Multiple Video, 50
Circuits, RF Frequency Sorting in Electronic Warfare Systems with Integrated Optical, 144
Commercial Cable TV Trunking Applications, Fiber-Optic Digital Video Systems for, 53
Communications in Canada, Optical Fiber, 43
Communications, Integrated Optoelectronic Silicon Devices for Optical Signal Processing, 167
Coupler for Full Duplex Transmission on a Single Optical Fiber, Bidirectional, 63
Coupling of Multimode Fiber Structures, 70

Data Multiplex System, Fiber Optics for the Shipboard, 12
Data Distribution, Multiterminal, 8
Data Processor, Development of an Integrated-Optics Multichannel, 151
Data Transmission System, An Operational 30 Channel 2 KM Fiber Optic, 2
Detection and Processing, Fiber Optic Rotation Sensor (FORS) Signal, 76
Detection and Processing Technique, Fiber Optic Laser Gyro Signal, 98
Development of an Integrated-Optics Multichannel Data Processor, 151
Digital Video Systems for Commercial Cable TV Trunking Applications, Fiber-Optic, 53
Drag in Single Mode Optical Fiber Waveguides, Fresnel, 88
Duplex Transmission on a Single Optical Fiber, Bidirectional Coupler for Full, 63

Electronic Warfare Systems with Integrated Optical Circuits, RF Frequency Sorting in, 144

Fiber, Bidirectional Coupler for Full Duplex Transmission on a Single Optical, 63
Fiber Communications in Canada, Optical, 43
Fiber, Multiple Video Channel Transmission on a Single Optical, 50
Fiber Optic Data Transmission System, An Operational 30 Channel 2 KM, 2
Fiber-Optic Digital Video Systems for Commercial Cable TV Trunking Applications, 53
Fiber Optic Laser Gyro Signal Detection and Processing Technique, 98
Fiber Optic Rotation Sensor (FORS) Signal Detection and Processing, 76
Fiber Optics Applications, Advances in Heterojunction Lasers for, 123
Fiber Optics in Medicine, 31
Fiber Optics for the Shipboard Data Multiplex System, 12
(A) Fiber-Optic Time Domain Reflectometer, 93
Fiber Optics Applications, Bistable Optical Devices for Integrated Optics and, 174
Fibers, Polarization-Independent Switches for Use with Single-Mode Optical, 188
Fiber Structures, Coupling of Multimode, 70
Fiber Waveguides, Fresnel Drag in Single-Mode Optical, 88
(FORS) Signal Detection and Processing, Fiber Optic Rotation Sensor, 76
Frequency Sorting in Electronic Warfare Systems with Integrated Optical Circuits, RF, 144
Fresnel Drag in Single-Mode Optical Fiber Waveguides, 88

Full Duplex Transmission on a Single Optical Fiber, Bidirectional Coupler for, 63
(The) Future of Integrated Optics, 104

Guided-Wave Acousto-Optics—Fundamentals and Wideband Applications, 132
Guided Wave Optics, Applications of, 107
Gyro Signal Detection and Processing Technique, Fiber Optic Laser, 98

Heterojunction Lasers for Fiber Optics Applications, Advances in, 123
High-Brightness Lasers Using Integrated Optics, 113

Independent Switches for Use with Single-Mode Optical Fibers, Polarization-, 188
Information Systems Applications, Optical, 19
Injection Lasers, Integrated Optical Components in Semiconductor, 117
Integrated Optical Circuits, RF Frequency Sorting in Electronic Warfare Systems with, 144
Integrated Optical Components in Semiconductor Injection Lasers, 117
Integrated Optical Signal Processors, Performance Limits of, 159
Integrated-Optic Modulators—a Review and an Assessment, 181
Integrated Optics and Fiber Optics Applications, Bistable Optical Devices for, 174
Integrated Optics, The Future of, 104
Integrated Optics, High-Brightness Lasers Using, 113
Integrated-Optics Multichannel Data Processor, Development of an, 151
Integrated Optics Research at Bell Laboratories, 111
Integrated Optoelectronic Silicon Devices for Optical Signal Processing, and Communications, 167

KM Fiber Optic Data Transmission System, An Operational 30 Channel 2, 2

Laser Gyro Signal Detection and Processing Technique, Fiber Optic, 98
Laser Photocoagulation of Blood Vessels, 34
Lasers for Fiber Optics Applications, Advances in Heterojunction, 123
Lasers, Integrated Optical Components in Semiconductor Injection, 117
Lasers Using Integrated Optics, High-Brightness, 113
Limits of Integrated Optical Signal Processors, Performance, 159

Medicine, Fiberoptics in, 31
Modulators—A Review and an Assessment, Integrated-Optic, 181
Multichannel Data Processor, Development of an Integrated-Optics, 151
Multimode Fiber Structures, Coupling of, 70
Multiple Video Channel Transmission on a Single Optical Fiber, 50
Multiplex System, Fiber Optics for the Shipboard Data, 12
Multiterminal Data Distribution, 8

(An) Operational 30 Channel 2 KM Fiber Optic Data Transmission System, 2
Optical Circuits, RF Frequency Sorting in Electronic Warfare Systems with Integrated, 144
Optical Components in Semiconductor Injection Lasers, Integrated, 117
Optical Devices for Integrated Optics and Fiber Optics Applications, Bistable, 174
Optical Fiber, Bidirectional Coupler for Full Duplex Transmission on a Single, 63
Optical Fiber Communications in Canada, 43
Optical Fiber, Multiple Video Channel Transmission on a Single, 50
Optical Fibers, Polarization-Independent Switches for Use with Single-Mode, 188
Optical Fiber Waveguides, Fresnel Drag in Single-Mode, 88
Optical Information Systems Applications, 19
Optical Signal Processing and Communications, Integrated Optoelectronic Silicon Devices for, 167
Optical Signal Processors, Performance Limits of Integrated, 159
Optic Data Transmission System, An Operational 30 Channel 2 KM Fiber, 2
Optic Laser Gyro Signal Detection and Processing Technique, Fiber, 98

-Optic Modulators—A Review and an Assessment, Integrated, 181
Optic Rotation Sensor (FORS) Signal Detection and Processing, Fiber, 76
Optics Applications, Advances in Heterojunction Lasers for Fiber, 123
Optics Applications, Bistable Optical Devices for Integrated Optics and Fiber, 174
Optics, Applications of Guided Wave, 107
Optics and Fiber Optics Applications, Bistable Optical Devices for Integrated, 174
-Optics—Fundamentals and Wideband Applications, Guided-Wave Acousto, 132
Optics, The Future of Integrated, 104
Optics, High-Brightness Lasers Using Integrated, 113
Optics Multichannel Data Processor, Development of an Integrated-, 151
Optics Research at Bell Laboratories, Integrated, 111
Optics for the Shipboard Data Multiplex System, Fiber, 12
Optic Time Domain Reflectometer, A Fiber-, 93
Optoelectronic Silicon Devices for Optical Signal Processing and Communications, Integrated, 167

Performance Limits of Integrated Optical Signal Processors, 159
Photocoagulation of Blood Vessels, Laser, 34
Polarization-Independent Switches for Use with Single-Mode Optical Fibers, 188
Processing and Communications, Integrated Optoelectronic Silicon Devices for Optical Signal, 167
Processing, Fiber Optic Rotation Sensor (FORS) Signal Detection and, 76
Processing Technique, Fiber Optic Laser Gyro Signal Detection and, 98
Processor, Development of an Integrated-Optics Multichannel Data, 151
Processors, Performance Limits of Integrated Optical Signal, 159

RF Frequency Sorting in Electronic Warfare Systems with Integrated Optical Circuits, 144
Reflectometer, A Fiber-Optic Time Domain, 93
Research at Bell Laboratories, Integrated Optics, 111
Rotation Sensor (FORS) Signal Detection and Processing, Fiber Optic, 76

Semiconductor Injection Lasers, Integrated Optical Components in, 117
Sensor (FORS) Signal Detection and Processing, Fiber Optic Rotation, 76
Shipboard Data Multiplex System, Fiber Optics for the, 12
Signal Detection and Processing, Fiber Optic Rotation Sensor, (FORS), 76
Signal Detection and Processing Technique, Fiber Optic Laser Gyro, 98
Signal Processing and Communications, Integrated Optoelectronic Silicon Devices for Optical, 167
Signal Processors, Performance Limits of Integrated Optical, 159
Silicon Devices for Optical Signal Processing and Communications, Integrated Optoelectronic, 167
Single-Mode Optical Fibers, Polarization-Independent Switches for Use with, 188
Single-Mode Optical Fiber Waveguides, Fresnel Drag in, 88
Single Optical Fiber, Bidirectional Coupler for Full Duplex Transmission on a, 63
Single Optical Fiber, Multiple Video Channel Transmission on a, 50
Sorting in Electronic Warfare Systems with Integrated Optical Circuits, RF Frequency, 144
Structures, Coupling of Multimode Fiber, 70
Switches for Use with Single-Mode Optical Fibers, Polarization-Independent, 188

30 Channel 2 KM Fiber Optic Data Transmission System, An Operational, 2
Time Domain Reflectometer, A Fiber-Optic, 93
Transmission on a Single Optical Fiber, Bidirectional Coupler for Full Duplex, 63
Transmission on a Single Optical Fiber, Multiple Video Channel, 50
Transmission System, An Operational 30 Channel 2 KM Fiber Optic Data, 2
Trunking Applications, Fiber-Optic Digital Video Systems for Commercial Cable TV, 53
TV Trunking Applications, Fiber-Optic Digital Video Systems for Commercial Cable, 53
2 KM Fiber Optic Data Transmission System, An Operational 30 Channel, 2

Vessels, Laser Photocoagulation of Blood, 34
Video Channel Transmission on a Single Optical Fiber, Multiple, 50
Video Systems for Commercial Cable TV Trunking Applications, Fiber-Optic Digital, 53

Warfare Systems with Integrated Optical Circuits, RF Frequency Sorting in Electronic, 144
-Wave Acousto-Optics—Fundamentals and Wideband Applications, Guided, 132
Waveguides, Fresnel Drag in Single-Mode Optical Fiber, 88
Wave Optics, Applications of Guided, 107
Wideband Applications, Guided-Wave Acousto-Optics—Fundamentals and, 132
